

REMARKS

In the Advisory Action mailed December 8, 2009, the Examiner stated that “[w]ith regard to the water content of milks and emulsions, this point is moot because the instantly examined composition is not limited to a non-aqueous composition.”

In fact, claims 51 and 53 were limited to non-aqueous compositions, and claims 54-63 used “consisting essentially of” language which substantially excludes water.

Claims 27 and 40 have now been amended to specifically recite non-aqueous compositions. Therefore, all claims in the application may now be considered to be directed to substantially non-aqueous compositions.

Respectfully submitted,

Ira J. Schultz
